How to read the map

Each dot is one executive's work in an area; dot size = number of schools covered. Labels show covered / total schools in that area (from each executive's own report).

Where two or three dots sit together, more than one executive worked that area:
Kunnamangalam – all three
Koduvally, Balussery – Basheer & Jayarajan
Kozhikode North/South, Beypore, Elathur – Arshad & Basheer

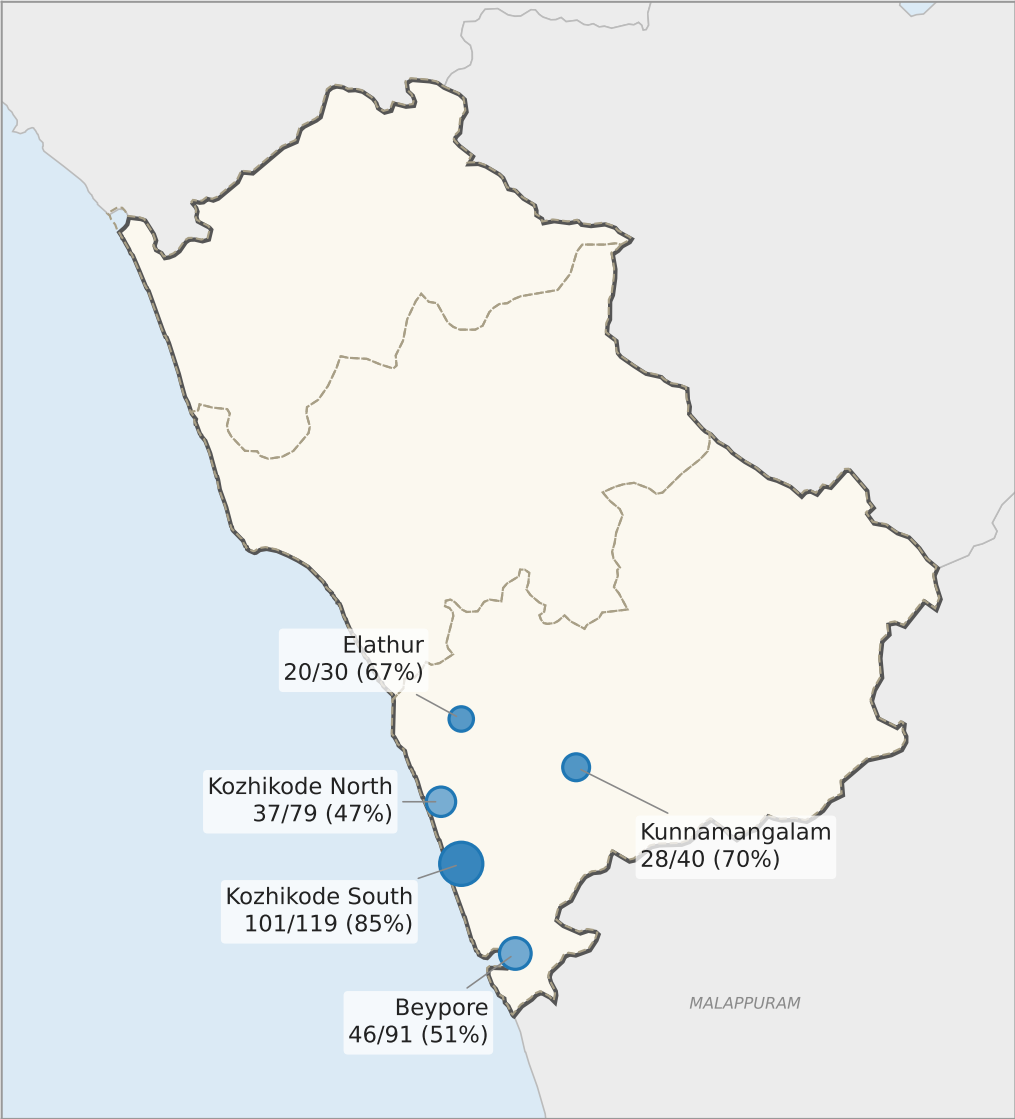

Arshad covered only part of Elathur and Kunnamangalam. Basheer also logged 8 visit entries in Malappuram (outside the district).

Dashed lines = taluk boundaries;
thin lines = village boundaries (Census 2001).
Dot positions mark the approximate centre of each area.

Area coverage by executive

Dot size = schools covered; the darker the dot, the higher the share of schools covered in that area.

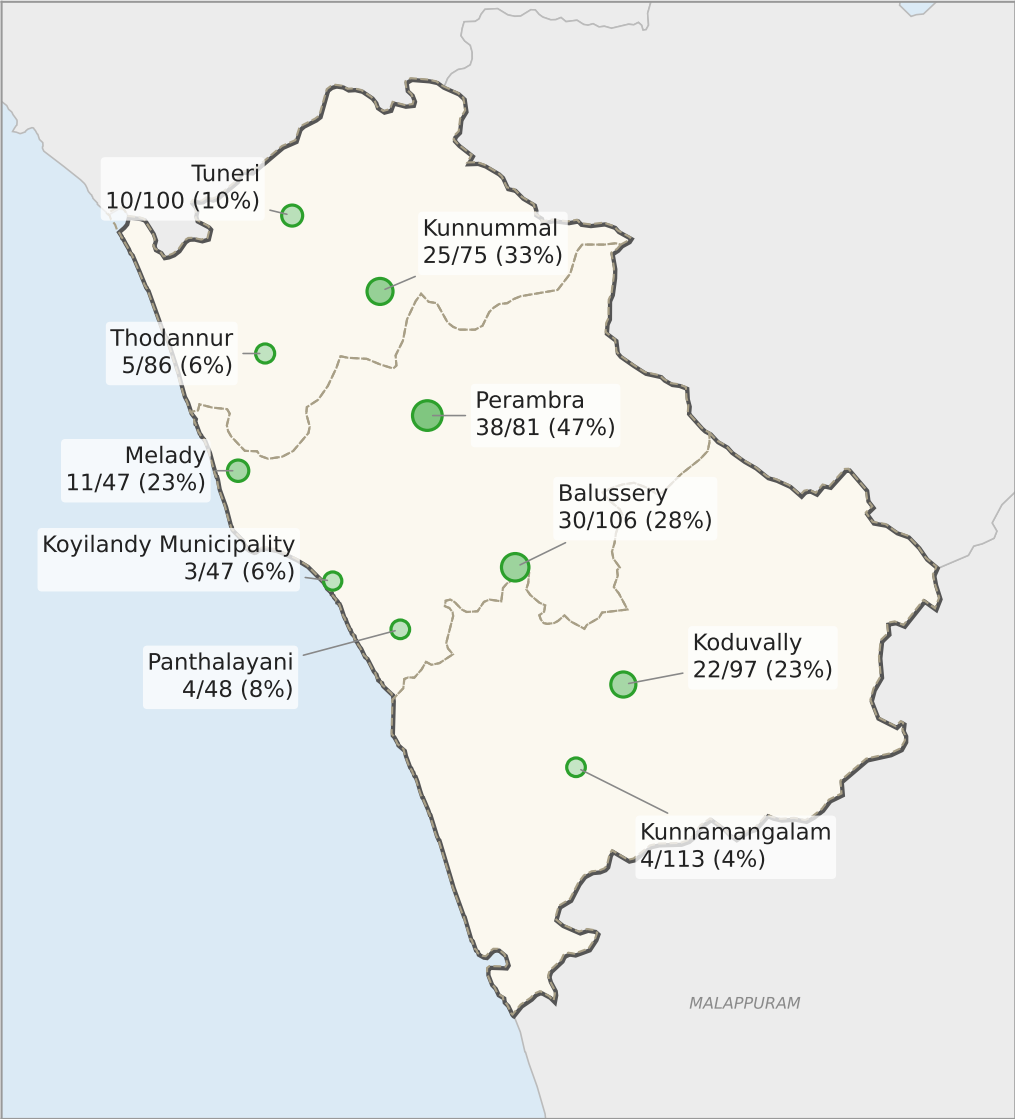

Arshad — 232/359 schools covered (65%)

Basheer — 166/751 schools covered (22%)

Jayarajan — 152/800 schools covered (19%)

Notes: 'Covered' uses each executive's own definition — Arshad: first visit done; Basheer: visited or given a free pass; Jayarajan: visited by Jayarajan/Amal (another 18 schools in his areas were covered by free passes through other executives). Totals come from each report's own school list, so the same area can show different totals. Arshad's Elathur and Kunnamangalam are partial areas. Basheer's 8 Malappuram entries are outside the district and not mapped.
