

SCHOOL VISIT & COVERAGE REPORT

Main Area-Wise Edition – Executive Tour: Musthafa | Malappuram District,
Kerala

Tour period covered: 22 June 2026 – 18 September 2026

Report generated: 20 September 2026

This is the consolidated, main-area edition of the coverage report: the 241 individual localities Musthafa recorded on his tour sheet are rolled up into the 13 main areas (official Malappuram Assembly / Block constituencies, plus one catch-all for localities that could not be confidently matched to a constituency) they fall under. For each main area, every school already covered (with the second-visit month, where noted) and every directory-listed Govt / CBSE / ICSE school still pending a first visit is shown, with its originating locality kept as a column so no detail from the full locality-wise report is lost.

METHODOLOGY & DATA SOURCES

1. Base data

This report is built directly on the locality-wise coverage report (241 localities, 580 schools already covered, 204 pending) – same visited-schools log, same CBSE / State-Syllabus / ICSE cross-checks, same second-visit-month and pending-first-visit logic. Nothing was re-derived from the raw tour sheet; localities were only re-grouped.

2. Main-area grouping

Each of the 241 localities was mapped to the Malappuram Assembly constituency or Block-Panchayat it administratively belongs to (e.g. Chungathara → Nilambur, Edakkara → Ernad, Kalikavur → Wandoor), using the official Assembly/Block names recorded against schools in the same locality in the State-Syllabus and Deepika Malappuram school-data directories – first by an exact match on a school in that locality, then, where no exact match existed, by the closest-spelled place-name match found anywhere in the directory (accepted only above a high similarity threshold).

3. Localities not confidently mapped

31 of the 241 localities (mostly short place-name fragments where the tour sheet's text was clipped or badly misspelled) could not be matched to a constituency with confidence and are grouped under "Other Localities (Block Not Confirmed)" at the end of this report, rather than being guessed into the wrong area.

4. Reading the tables

Every row keeps its original "Locality" (the free-text place Musthafa wrote on the tour sheet) so the main-area tables can still be filtered or cross-checked against the locality-wise report.

5. Type / Board classification

Government, Aided and Unaided-Recognised schools (state syllabus) are shown as "Govt" with the sub-type in brackets; CBSE- and ICSE-affiliated schools are shown as "CBSE" and "ICSE" respectively. Where no type was recorded and no directory match was found, the school is marked "Type Not on Record".

6. Source-sheet text clipping

A subset of contact-person names are clipped at the start on the original tour sheet itself (e.g. "ris Babu(Principal)"), reproduced here exactly as on the source; phone numbers and school names are unaffected.

FINAL SUMMARY – CATEGORY-WISE TOTALS
