How to read: *Total schools* counts Kozhikode School Data, plus Deepika-only and CBSE/ICSE schools, placed by area. *Covered* means a directory school matched to one of Basheer's visits (by phone, or by place, school type and name) or to a free-pass feedback entry. *Pending 1st visit* is everything else in the area. Many of Basheer's visits are pre-primary schools, anganwadis, colleges and buds schools, which are not in the directories; they are listed under the area but are not counted as 'covered'. **Confirmation probability** (my estimate): Confirmed 90% (tour confirmed or a date given) · High 70–75% (free-pass feedback 'Interested') · Medium 50–55% (tour month given, details shared or second visit planned) · Low 20–25% (busy or not answered) · Very Low 5% (not interested, wrong number, or booked elsewhere). Mobile = 10 digits starting with 6-9. 496/495 numbers are landlines.

Method notes

Each visit is placed in its main area by the matched directory school. If there is no match it uses the place name, and if the place is missing it uses the area of the same day's other visits. Deepika's list and the Kozhikode School Data share about 1,256 school names; the rest were joined by phone. 'Matched' means the same phone, or a strong place + type + name match. 'Probable' means place and type agree but the school name is generic, so check these on the next call. One log row is dated 07.06.2026; it sits between early-July entries and is shown as written.
