– expected tour confirmations	≈ 63	≈ 64	–	≈ 127

* 5 areas were visited by both Athul and Arun (Chalavara, Edathanattukara, Koduvayur, Mannarkkad, Muthalamada). Schools they covered there are counted under whoever visited them (Athul 27, Arun 13). The 24 schools not yet visited in those areas are shown separately so nothing is counted twice.

2. Mobile numbers in detail

Group	Athul	Arun	Shared areas	Total
Covered schools – with mobile	240	295	–	535
Covered schools – without mobile	13	4	–	17
Not yet covered – with mobile	78	235	9	322
Not yet covered – without mobile	82	146	15	243
With mobile number	318	530	9	857
Without mobile number	95	150	15	260

A mobile number means a 10-digit number starting with 6, 7, 8 or 9. “Without mobile” includes schools with only a landline (234) and schools with no number at all (26).

		passes			

Two more free passes have no executive name, but their phone numbers match schools in the covered list: V R U P S Muthukurussi (Arun's school, 4 persons) and G.H.S.S. Muthalamada (Athul's school, 4 persons). Their confirmation is High (Muthukurussi: interested, tour time November, UP ~60 students) and Medium (Muthalamada: neutral, but tour planned for October after Kalamela, ~1,250 students). Counting these too gives Athul 5, Arun 8 (13 in total). The register has 104 free passes across all executives.

4. Confirmation probability

Each covered school is given a level based on what the two files show about it. The percentage uses these assumed chances: High = 70%, Medium = 40%, Low = 10%.

Level	Rule used	Athul	Arun	Total
High (70%)	Took a free pass and said they are interested in a group visit or gave a tour month	1	2	3
Medium (40%)	Follow-up month fixed, or took a free pass (neutral / feedback pending)	122	111	233
Low (10%)	Covered, but no follow-up month and no free pass	130	186	316
Covered schools		253	299	552
Expected tour confirmations		≈ 63	≈ 64	≈ 127
Estimated confirmation probability		24.7%	21.5%	23.0%

This is an estimate, not a record of confirmed bookings. The 70/40/10% weights are assumptions, and they can be changed once real confirmation numbers are available. The 565 not-yet-covered schools are not included, because no visit has been made there yet.

5. Notes

- School counts come from the 222 area sections of the school report. The totals match the report's own cover page (552 covered and 565 pending).
- The report lists every covered school under "Second Visit", so second visits = schools covered.
- Areas are assigned to the executive who covered schools there. A not-yet-covered school counts under Athul or Arun based on its area.
- Some schools appear twice under different contact persons (for example G.V.H.S.S. Alanallur). They are counted as the report lists them.
