How to read this table. *Schools in data lists* counts every State, CBSE and ICSE school in the area. *Covered* counts the schools that match an entry in Musthafa's log. *Other visits* counts places he visited that are not a separate school in the lists: pre-schools, colleges, LP/UP sections of a school already counted, and schools missing from the lists. So he may have more visit entries than covered schools.

CBSE and ICSE schools are placed in an area by the PIN code in their address. When his location was blank, the area is taken from the entry just before it in his route. Names are spelled differently across the lists, so a few matches may be wrong. Please check before calling. 4 of his entries (Thottumukkam, Cheruvadi) are in Kozhikode district. They are listed at the end.
