School Visit, Follow-up & Booking Report - Arshad (Kozhikode District)

This report compares Arshad's day-by-day visit log (13 Aug - 23 Oct 2026) with the Kozhikode school directory, the Free Pass visit data and the Confirmed Booking data. It covers **only the six areas Arshad has actually worked in**. For each area it shows how many schools exist, which he has visited, which are still not visited, the planned second visit month, the free-pass feedback, confirmed bookings and a booking probability for every visited school.

* Private / CBSE / ICSE schools, colleges, ITIs and anganwadis that Arshad visited but that are not in the Kozhikode directory list. Coverage = directory schools visited / directory schools in the area. Units of the same school (HS, HSS, UP or LP section) are counted once.

Key points for the executive team

- **14 bookings** in the confirmed booking file are for schools on Arshad's visit list (722 students/staff where counts are given). 2 more bookings in his areas came from other sources (Quba Edu Home, Asha Kiran Special School).
- **23 schools are close to booking** (almost confirmed, advance or free pass booked, or a hot free-pass lead). These need a call or visit this week.
- **32 schools had a second visit planned for September/October** that is now overdue and still not booked.
- **104 visited schools have no tour month yet**, mostly because calls go unanswered. They should be visited in person rather than called again.
- **336 schools in the directory are not yet visited** in these six areas. Kozhikode City South (82 of 100) and Feroke (55 of 81) are best covered. Chelannur, Mavoor and Kunnamangalam have only been touched (under 25%).
- The visit log is often not updated after a booking or free-pass visit. Section 6 lists every mismatch found.

How the data was compared

• **Visited schools** - every row of Arshad's log was cleaned (dates, spelling, split cells) and grouped into schools. Several contacts for one school, and HS/HSS/UP/LP sections of one campus, count as one school.
• **Area** - each school was matched by name and locality to the Kozhikode directory, whose lists are organised by education sub-district. The area of a matched school is its directory sub-district. Unlisted schools are placed by locality.
• **Not yet visited** - directory schools in the same sub-district with no matching entry in the log. The City North directory list ends at 'Saraswathi Vidhya Mandiram' (entries from S to Z are missing in the source), so schools such as Savio HS, Silver Hills, St. Joseph's and St. Michael's show as 'not in directory'.
• **Second visit month** - the month written in the log's second-visit column. Where it is blank, the first month of the tour time the school gave is used. 'Not fixed' means the school has not yet given a tour time.
• **Free pass** - the Free Pass file (entries 18 Jul - 21 Sep 2026) was matched by school name and phone number. Free-pass visits after 21 Sep that are only mentioned in the log are listed separately.
• **Confirmed bookings** - the Confirmed Booking file was matched by school name and phone number. Only bookings for schools in Arshad's areas are shown.

Booking probability - how each school is graded

Grade	Likelihood	What it means (from the latest remarks, free pass and booking data)
Confirmed	100%	Listed in the Confirmed Booking file (advance paid / booked / trip done).
High	70-90%	Almost confirmed, advance or free pass booked, already visited on a free pass, or a hot lead in the Free Pass file.
Medium	40-60%	School has given a tour month or window and details have been shared; no negative signal.
Medium-Low	25-40%	Tour month given but the last calls go unanswered, or the school will decide after a meeting or visit.
Low	10-25%	No tour time yet; calls not answered, busy, switched off or waiting.
Nil	0%	Not interested, trip fixed elsewhere, came last year, very small school, or wrong / invalid number.
